

To Whom This May Concern:

I fully reject the NAB's petition to limit the variety of features on XM radio. I pay a monthly fee to exclusively listen to XM radio so I can have a variety of stations and entertainment. I live in the California desert and there are limited FM stations offered to the public. The NAB should understand that satellite radio is here to stay...political tactics won't make it go away. Limiting satellite radio's variety of programming is wrong and shameful!
